S. Lily, the British essayist: autobio-

ligious problems in the United States; and literary articles, discussing the ten-dencies of literary work along all direc-tions of activity, by the foremost critical writers.

The Cosmopolitan

The American magazines have come to be recognized the world over as the best illustrated and most ably conducted; in fact, it is said that larger editions are sold in England of at least two of our leading magazines than of any of the English monthlies. This condition has resulted from the fact that the American magazines hesitate at no expense either for the purchase of manuscript or for illustration. \$50,000 has been paid by one magazine for a single series. Millions are invested in the business, and they can well afford to pay any price for an article of unusual interest. In proportion to bound volumes, the magazine give as four to one. Take for instance the C smopolitan, which contains annually 1,536 pages by the leading writers of the world, and more than 1,200 illustrations by clever Mr. Blaine to hunting for a synonym of "Reciprocity" that is easy to pronounce.

The limited meaning of the word is never more apparent than when it is an ever more apparent than the first-class magazine at the low price of \$2.40 would be quickly appreciated by the public. His expectations have been more than fulfilled, and the December issue of the Cosmopolitan reached the OKLAHOMA OUTLINES

"I can trace for you the scientific uses of coriosity," declares Br. Andrew Wilson, years ago the selentific asset the imagination. What is all selence, may I ask, save curiosity-arranged, orderly, systematic curiosity? To question the 'whys' and 'hows' of nature is the business of the scientist. He questions and cross examines pesses, and as a result our scientific friend gets at the truth about things by resson simply of his corlosity.

exercise of it he builds up the knowledge which makes him and his race intellectual ly, physically—may, even financially—rich. This is the science of enriceity, but for think, don't work. None of them are carried there would have been no science easy. Oh, my honest friend, you are in curiosity, bridied and trained, as the kind of genius which takes us all as children by we may fearn the server of the universe.
